EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

On page 1 after the title, please insert the following sentence:

--This application is a National Stage entry of International Application No. PCT/EP99/02059, filed March 26, 1999, and claims benefit of foreign priority to German Application No. 198 15 400.3, filed April 6, 1998.--

2. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is the limitation that the samples are taken from a separation gel. The spot pickers described in the prior art of record (e.g. Togawa et al) describe devices and methods involving single tools for taking samples. Devices using multiple independently actuated tools for removing samples from media other than separation gels are known (e.g. Carr et al, Kakimoto, Meltzer), but they provide no disclosure or suggestion that they can be used to remove samples from separation gels, and one having ordinary skill in the art would find no motivation to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
